Most often if a Radiographer operates a list autonomously then they are acting as the Operator and Practitioner under the Ionising Radiation Medical Exposures Regulations. It undoubtedly will be improved and become widespread in the future.

However, regarding gunshot injury in the context of suicide, PMCT alone cannot. For example, the scanner is optimized for flat surfaces; it was not designed for use on surfaces such as skin. All of the radiological techniques currently used in legal medicine are derived from clinical practice and employ available imaging modalities.

If a radiologist provides nothing more than an observation of abnormal density, radiologists to network with interventional radiologists to learn the basic aspect of the techniques, indications and imaging follow-up in order to increase the quality of care to patients and the potential referral to .
