In other projects Wikimedia Commons. These bubbles then speed upward, like bubbles in a glass of champagne, before breaking the drop's surface and releasing microscopic particles, called aerosols into the air. The drought also had an effect on religion. The weather in the tropics is dominated by the tropical rain belt which moves from the northern to the southern tropics and back over the course of the year. February Learn how and when to remove this template message.

WinterSpringSummerAutumn.Frank Siebold, a rancher down in Patagonia and a great storyteller, used to tell of the time a long dry spell hit southern Arizona. They found that more particles were produced by light or moderate rainfall compared with heavy downpours, which are then spread by the wind.
