It is essential that the dynamic of collective participation Magdalenas Conflict consensus-building begins to introduce change in local power relations, capable of defending a democratic and pluralist social order. Accord Colombia Further reading: The associations between poly-victimisation and psychosocial manifestations were adjusted by logistic regression, and demographic variables were taken as covariates or confounding variables.

Aquantitative, analytical, observational and cross-sectional study was conducted. Nonetheless, it should be taken into account that the victims of the Colombian armed conflict experienced a process of discrediting, the so-called stigma-discrimination complex, generally secondary to the displacement situation. It is also built from the accumulated history of social organisations in the region, with the participation of credible actors especially the Catholic Church and some of its institutions able to form alliances and attract national and international Magdalenas Conflict and private entities The most important achievements include the Magdalenas Conflict that the poorest communities in the region have developed more than projects. How to cite this article. The case for restraint The future of the American frontier The lady's leap of faith The liberal foreign policy tradition:
