This is more commonly referred to as co-occurring disorders, or dual diagnosis. This resolves some issues about where ultimate responsibility lies, but leaves unanswered other questions about the nature and practicalities of the relationship between mental health and substance use services eg, information-sharing and also leaves unstated the roles of other support and treatment services needed by people with coexisting mental health and substance use issues.

The sooner you get started, the sooner your recovery begins.

Understanding the Challenges of Dual Diagnosis. An Australian study suggested that in some cultures this may differ for men and women – or at least, that for men an alcohol-focus may be a more acceptable and effective way of tackling their depression and drinking, while for women a focus on depression may be preferable. A New Chapter Starts Here.

Quadrant model of dual diagnosis. This resolves some issues about where ultimate responsibility lies. This is often an overlap between these two conditions. If you are interested in entering a drug addiction treatment program that is well versed in dual diagnosis treatment, call
