Based on in-depth and meticulous analyses of naturalistic data, it explores how the systems of both languages affect each other as the children develop, and how different levels of exposure to each language influence the nature of acquisition. The series focuses on key topics in the study of contact between languages or dialects, including the development of pidgins and creoles, language evolution and change, world Englishes, code-switching and code-mixing, bilingualism and second language acquisition, borrowing, interference and convergence phenomena.

The first of its kind, this original study is a must-read for students and researchers. It provides a broad perspective on Africa as a linguistic area, as well as an analysis of specific linguistic regions. Network Science is a new journal for a new discipline - one using the network paradigm, focusing on actors and relational... Written by an internationally renowned linguist, the book discusses the nature and significance of internal and external factors or 'ecologies' that bear on the evolution of a language.

Design Science is an international open access journal publishing original research. Are you sure you want to delete your account? He begins with European colonization and then, working backwards, surveys the Nilotic migrations southwards, Arabian colonization of North Africa, and the Bantu expansion.
