The heart receives its inflow from the veins, where pressures are as low as 5 mm Hg, and pumps the blood to the arteries, where systemic mean pressures can be as high as mm Hg. These four terms therefore carry the same information for gases. We mention only a .

Introductiontomonitoringofrespirationandcirculation-Blom. Dead space 17 1. Chapter 9 discusses how individual measurements are combined into an overall picture of the condition of the patient, how physicians use that overall picture as a basis for their therapeutic actions and how therapy in turn influences the measurements.
