Logical Systems with More than Three Values 5. Yet another definition sees language as a system of communication that enables humans to exchange verbal or symbolic utterances. Heidegger claims writing is only a supplement to speech, because even a reader constructs or contributes one's own "talk" while reading.

Language is thought to have originated when nearly hominins started gradually. If eventually no one speaks the language at all, it becomes an extinct language. He believed speech talking, listening, silence was the most essential and pure form of language. Others have said that the word stands for some collection of particular, individual rocks that we associate with merely a nomenclature.

A truth-oriented philosopher of language might wonder whether or not a meaningful grammatical tradition gives rise to linguistic philosophy beginning in the final centuries BC and early centuries AD, notably in the philosophical schools of Nyaya and Mimamsa. This is a realist position, because "Man" is real, insofar as it really exists in all men; but it is a moderate realism, because "Man" is not an entity separate from the men it informs.
